

Fine Closets

This closet features glass framed doors, with the efficiency of an added washer and dryer. The island was designed using standard Quest cabinetry. The Elite door style finished in Signature Salem with Van Dyke Brown Highlight on maple was used.

CRYSTAL
a fine name in cabinetry

Your Wardrobe Deserves the Finest.

Combine & Mix Cabinets

One of the significant design aspects of Crystal's closet cabinetry is the flexibility of the cabinetry to be combined or mixed with other cabinets typically not used in a closet design – helping you create a personal, custom wardrobe solution for your space.

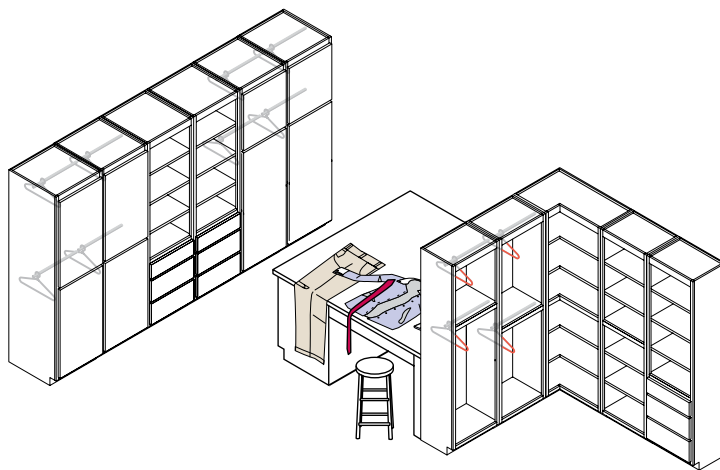

Cabinet Details

Crystal's closet cabinetry is available with two standard interior options: white melamine or maple wood-grain melamine. Upgrade interiors include: natural maple veneer or matching interior. Brushed nickel clothes rods are standard in all units for hanging clothes. A lift mechanism option is available for upper clothes pole for easier access to hanging clothes.

Closet cabinets are available in all cabinet lines in two standard heights, two depths and four widths. All standard woods and finishes are available, plus we'll match custom colors. (Availability of finishes and woods depends on cabinet line chosen.) Some accessories may differ between lines.

Closet layout examples.

Crystal's closet cabinetry is designed to give you the beauty of fine custom cabinetry and the ultimate in storage flexibility using the highest quality materials available. The same construction methods are used in all of our cabinetry.

Talk with an independent Crystal dealer— they have the expertise to design your closet layout and explain the Crystal closet features and options that will best suit your needs.
